Treatment Stone Bed 理疗石床

此理疗石床是一种由各种不同的Canban石(如锗、硅、镭等)制成的按摩床。创新性远红外线自动控温装置能够使按摩床上的石板释放出对人体有益的远红外线和负离子，帮助人体在理疗过程中由内而外受热。另外，事先将理疗过程中所需的精油涂于石床表面，停留10到15分钟，Canban石所释放的远红外线可使精油被人体肌肤更好地吸收。在石板上加床垫，能使按摩床更加舒适。床垫表层是由混合了精制锗石和锆石粉的人造纤维材料制成，床垫内部是黏弹性泡沫材料。

Treatment Stone Bed

Treatment Stone Bed is a massage bed made of Ganban bio-positive stone. Treatment Stone Beds come with a variety of stones: Germanium, Silica, Radium, and others. Moderately heated by an innovative far-infrared ray heater, the stones continuously release their own infrared rays and negative ions, warming the body from the inside. In addition, the far-infrared rays the Ganban stones release transform the essential oils that are used during treatment. Leave the oils on a Treatment Stone Bed for 10 to 15 minutes before a treatment and they will become mellower and the skin will absorb them more easily. Placing Visco-elastic foam on the stone plates makes them soft and smooth. The covers for the foam are made of a kind of textile comprised of rayon fibers that have been mixed with fine germanium and zirconium powders.
